ABOUT US

The single largest hazard in the milk available in the market today is that it is spurious milk containing dangerous chemical additives or residues. Milk cannot be relied upon unless it is pure or else it will hurt us rather than help us. For example, cows are being injected daily with a double dose of a banned substance called oxytocin, which is a hormone, to speed the process of let down of milk and also to obtain more milk from the cow's udder. Apart from being painful for the cow, and therefore cruel, such injections also have the disturbing effect of advancing the age of puberty in children who consume the cow's milk. Malpractices like these are countless and go unnoticed, which is further fuelled by an ever increasing milk bubble where all that resembles milk sells.

Puremilk is 100% antibiotic, oxytocin and hormone free milk. At our farms, located in Hooghly West Bengal, we don't compromise. We don't ask how to make milk cheaper. We don't ask how to make lots of milk. We only ask this: how do we make milk better for the women and children who shall consume it. This is the driving force behind what we do.

Puremilk is an enterprise undertaken by Auckland based, New Zealand Fresh & Natural Limited.

DAIRY FIELD OFFICER/FARM MANAGER

If you are a college graduate with an interest or experience in farming or dairy and generally a desire to make a positive contribution in people's lives, we invite you to join our team. Job responsibilities would include ensuring effective feed management, cattle nutrition, and also implementing best farming practices as developed by the farm management. You will be required to improve processes from the stand point of improving quality of the end product.

CANDIDATE'S PROFILE

Puremilk is currently hiring for full time candidates. A suitable candidate would be someone having attention to detail, intelligence, good work ethics, integrity and also an interest in farming or dairy.
